Fully 1000 Freenans will go to Han-ford today to take part in the colebra-tion of the completion of the Valley it to that town. It will be remen pered that the Hanlord committee of bered that the financial distribution arrangements sent 800 excursion tickets to Freezo for distribution, but this number has been found insufficient. ber has been found insullicient. Three hundred und litty were given to the Hundred Thousand Club, 150 to the Chamber of Commerce and 100 to the militia. It was agreed that each member of the two bedies first named should receive three tickets. As the Hundred Thousand Club has 145 members, it will be sent that it was 85 tickets chort. The chamber, besides providing its own members with three tickets wast, also intended to supply the contributors to the right of way fund, but it found that it had greatly anderestimated the number of contributors. There has been a great demand for tickets, as everybody, apparently wants in high the Hanfordius to osibrate. When it was found that all the tickets had been distributed, bowreer, there was what is inolegantly, but appropriately, termed a "lowd," The object of the contributors of the contributors of the contributors of the contributors and the railroad company were indiscriminately biamed and the ticketles thought they were revery much abused. Of course their retictions were unjust, as neither of the organizations meationed had anything to do with fixing the mousber of ticket to be distributed in Freeno. That was the work of the Hanford committee, which, after all, must be admitted to have been exceedingly libers!

However, hearing that the directors of the road would arrive in Freeno last ovening, it was decided by the Hundred Thousand Club to send a committee to meet them and set that accommittee to meet them

The Hourled Thousand Clab committee made known its wishes to the directors, but till not receive much can spokenme, and stand that in the first place it had been agreed that only 1600 persons should go from here to Hanford, while 800 tickels were given to Freene by the Hanford committee.

liffs place it had been agreed that only mild pursons should go from here to Hanford, while 800 tickots were given to Freeno by the Hanford committee. However, the company would do its atmost to accommodate this number, though there would have to be some three contany's fault that more second the contany's fault that more second-modations had not been provided, as it had nothing whatever to do with the arrangements. The proposition made by one of the committeemen that freight cars be attached to the tails was not being pointed out that it was against the law to put them on behind a passenger train, while if they were sandwiched in between the air brakes would be disconnected.

The Expositor says that "the walt-uses at the Lytton restaurant are very ulignent at the contemptuous way indigenet at the contemptions way in which they were apoken of in the Ramenta. As a special set of the second of t

The contemptions language referred to by the Repusion was compained in the following sentence: "It the building that was burnet; "It the building that was burnet; and been escapied by asversi young women who are employed as waitressen in the Lyston restaurant." Of course the writer should invo used the word "Indical" instant of "women," "In it at a extent of his official, and it's too but he can be prosecuted for follow. However, banishment to Shelbyville ought to do for him, and it is to be hoped that this will asliely the venture of the lables at the Lyston. But what will they say to the Republica's brutal reference to them as "waitrasses"? Could met the ruporter have just as well written "waiter shelles," which sounds much more olegent and is no doubt much more olegent and is no doubt much more olegent and is no doubt much more correct?
